

CakeGame Finance

Whitepaper V1, 2021

Introduction

CakeGame Finance is a project fully loaded with mouthwatering features. It will be officially launched by December 2021; CakeGame Finance brings great value to the NFT & Play-To-Earn Gaming space like none other! It's Easy Play-To-Earn Gaming, NFT rewards in Cake, Auto-Buy Back & Burn mechanism, and Auto Liquidity addition.

CakeGame Finance is anticipated to take place as one of the most valuable NFT projects of 2021, 2022 & more. There is no qualm that the demand for CakeGame Finance will exponentially increase when Blockchain gamers & NFT Lovers start earning in Cake with their NFTs.

CakeGame Finance is building a metaverse for the Pancake clan on BSC and across-chain.

GamePlay

CakeGame Finance is an Easy-to-play NFT Game, all you need is the CakeGame token to get started. Users will be able to defend the CakeGame Finance by fighting against the angry bears. Users will be rewarded with CaKeGame for every time they win against the enemies.

Breeding your Game

A limited collection of unique CakeGame NFTs

There are 2 stages of involved in breeding your Game. First is by Acquiring your CakeGame, then opening your CakeGame to reveal your Random Game. You need to own a CakeGame to engage in rewarding activities such as bounty hunting and fighting Monsters.

Rarity	Bounty Stat Range
Rare 1	10 - 20
Rare 2	30 - 40
Rare 3	50 - 60
Rare 4	70 - 80
Rare 5	90 - 100
Rare 6	200 - 300

There will be limited collection of Game for sale, once sold out, you can only purchase your CakeGame from the marketplace. Buying of CakeGame will made in Cake while every other purchase in the marketplace will require CakeGame tokens to pay fees.

Battling

The Game-Keeper will be able to defend the CakeGame by Battling against the angry bears and dragons daily. The player first selects the creatures to use in battle and equips them with weapons. Weapons and other in-game items are available for purchase in the MarketPlace. The player will pay a little BNB gas price to engage in combat with a chosen enemy.

The stronger the enemy, the greater the reward. However, the players need to pay attention to the calculated win rate. Choosing the opponents wisely will bring many victories and rewards to the players. They can then upgrade their CakeGame to defeat stronger enemies.

The game then rolls for battle results and records them on the blockchain. If the Battle ends in the player's favour, the player receives CakeGame Token and character experience. If the outcome is a loss, the player will still receive a few EXP but no reward token.

The rarity of the Game determine the maximum turns to play in each 8 hours

Estate	Percentage	Turns to Battle Monster each 8 hours
Rare 1	52	1
Rare2	26.12%	2
Rare 3	8.7%	3
Rare 4	6.53%	4
Rare 5	3.48%	5
Rare 6	2.92%	6

Experience points

Experience points (EXP) will be accumulated through the matches. CakeGame Finance will level up when they reach the required EXP. The CakeGame Finance with higher rarity can accumulate EXP faster.

Level	EXP
1	0-99
2	100-349
3	350-999
4	1000-1999
5	2000-3999
6	From 4000

The CakeGame Finance which have high level in rarity and evolution can earn more \$CakeGame as rewards for winning

Bounty Hunting

Bounty hunting in CakeGame Finance

What is Bounty Hunting?

Basically, the Bounty Hunting feature allows users to Stake CakeGame NFTs to receive rewards in \$CakeGame tokens.

The feature will be released soon

Bounty Hunting Rules

-The total daily bounty is fixed and divided among all participating CakeGame. Each participating CakeGame will receive a reward corresponding to their bounty hunting ability.

-This stat depends on the CakeGame rarity and will be random within a specific range.

Rarity	Bounty Stat Range
Rare 1	10 - 20
Rare 2	30 - 40
Rare 3	50 - 60
Rare 4	70 - 80
Rare 5	90 - 100
Rare 6	200 - 300

- The system continuously rewards players for participating in bounty hunting in real-time, and they can claim it at any time.
- CakeGame participating in bounty cannot be traded on the CakeGame Marketplace.

Marketplace

CakeGame Finance NFTs Marketplace is where you create, sell, and buy NFTs like Bsc warriors and other in game assets. Moreover, you can launch NFT auctions, earn commissions from affiliate programs, and build your favorite NFT collection.

Autoplay & \$Cake

Game-keepers who are lucky enough to access the highly rare magic stones will have their Cake warriors battle angry bears while they are away, thus earning the user \$CakeGame and \$Cake. A novel approach to earning dual rewards.

There are only 1000 magic stones in existence, a very rare collectibles the earns players dual rewards

-players must have a CakeGame NFT before stone can be activated, one magic stone per Cake

-maximum stone per account is two

-once you have the magic stone, you select the CakeGame to use and enemy to combat, to start earning

CakeGame Token

CakeGame Finance native token is \$CakeGame

Specification

Name: **CakeGame Finance**

Symbol: **CakeGame**

Network: **BSC**

Decimals: **18**
